This message has been forwarded.

When I checked with management we have not been able to satisfy the paperwork for the government to allow for processing orders. If you can email me all of the paperwork that will need to be filled out and company information that we have to give that may help the process. We have spent many hours rewriting contracts to have the whole thing fall through because we cannot complete the paper work the government needs.

Trey

Hi Trey,

Could you forward your standard licensing agreement to me so we can check it out? Another option to alleviate concerns about public release is to include a confidentiality clause to the agreement. Was a confidentiality clause considered by Geomaps for this order?

thanks,

Jill Dean

With any of our maps services and licenses you never own the maps you just use the maps. I am the person to discuss licensing agreements. You can forward any information you have and I will have the management look it over.

Trey

Hi Trey,

Could you tell me whether the 6 month contract for the maps is a licensing agreement or it would allow EPA to own the maps? (Licensing agreement would not given ownership of the maps to EPA; it would merely allow us to use them.)

Would you also mind putting me in contact with someone to discuss purchasing/licensing agreements? I understand Geomaps concerns about selling to us, and I have some information that may be useful.

Thanks,

Geomap feels that research within a government agency poses to many chances for our structure map data to be placed in the public records.

Geomap provides the data to companies that are engaged in oil and gas exploration and the data shall not be used in service bureau, information service or not for profit.

Sorry for the confusion and thanks for the interest.

Trey

Hi Trey,

Do you have any time to talk about the maps today? We were kind of blind-sided that Geomaps does not want to sell the maps to us now after we received the invoice a couple of weeks ago. I'd like to find out why Geomaps isn't interested in doing business with us.

Thanks,

Mr. Morgan,

Geomap had submitted a quote to Nancy Dorsey in our Region 6 offices for three (3) paper structure maps on August 30, 2011. I will be handling the issuance of the purchase order.

In order to proceed, Geomap will need to register in our Central Contractor Registration database located at <https://www.bpn.gov/ccr/default.aspx>. Registration can take several days. If you are already registered, please provide me with your company's DUNS number or registered name.

Also, the Federal Government does not pay sales tax so we will need a revised quote reflecting the removal of the proposed cost.

If you have any questions, please let me know.
